ADDENDUM No. 4
Structural Steel Painting Services
M&T Bank Stadium
MSA Project No. 22-038

Date Issued: January 14, 2022

This Addendum is hereby made a part of the Contract Documents dated December 21, 2021, on the subject work as though originally included therein. The following amendments, additions, and/or corrections shall govern this work. **This form should be acknowledged below and submitted with the Bids.**

This Addendum incorporates the following items:

1. **Revised Due Date:** January 25, 2022 by 1:00 p.m.
2. Questions and answers.
3. Note: Appendix I - Areas to be Painted is only meant to show typical locations that require painting. See IFB for quantities of all except raker beams.
 - a. Image II - TYP of Raker Beam: These beams go all the way around the stadium and all need to be painted. Quantities and sizes can be determined from the structural drawings provided with Addendum.

Questions and Answers

1. For the upper deck above the horizontal beam steel, does the part that extends above the seating bowl need to be painted?

Yes. An example of the steel in question is in the picture below on either side of the coach's booth. These extend up from the raker beams at each location there is not a light tower.

2. For bidding purposes - If there are light fixtures or netting that needs to be removed to paint, should that be accounted for in the bid.

No. MSA will remove.

3. For the corner raker beams, there is no horizontal beam stopping point. Should the entire beam be painted?

Yes. See below picture for example. TYP of one per corner of each upper deck endzone / sideline section.

4. Can you provide dimensions for the East and West M&T Signs?

The signs are roughly 65 feet long by 9.25 feet high.

5. Are we able to hook up to the stadium's water supply to wash any dirt and grease away from the areas within the scope of work?

Yes

6. If needed, are we able to block off sections of the parking lot for staging and larger lifts?

Yes. This will have to be a coordinated effort between MSA and the contractor to work around complex events.

7. Which personnel are required to be on site? i.e. superintendent or project manager. Can one person fill multiple roles?

There should be one consistent and competent on site contact. One person can fill the superintendent and project manager role.
